## BEL-RAY® THUMPER GEAR SAVER TRANSMISSION OIL 80W-85

**Bel-Ray Thumper Gear Saver Transmission Oil 80W-85** has been developed for the unique demands of 4-stroke motorcycles equipped with separate engines and transmissions. Formulated with extra protection for gears and bearings subject to high torque loads of today's powerful 4-stroke Thumper engines.

This multi-viscosity formula flows freely for better clutch cooling and provides positive clutch engagement for better starts and longer clutch life while protecting highly-loaded gears from wear, ensuring smooth shifts for more positive action.

### *Applications*

- For all motorcycles equipped with separate engines and transmissions
- Equally suitable for gear or chain primary drive

### *Features and Benefits*

- |                                  |  |
|----------------------------------|--|
| ◆ Extreme Pressure and anti-wear | Eliminates wear by chemically bonding to gear wear areas. Prevents metal-to-metal contact caused by heavy shock loads during on/off throttle operation.              |
| ◆ Low friction                   | Special lubricity additives cling to metal surfaces reducing internal friction. High film strength and reduced film thickness lower internal drag and heat build-up. |
| ◆ Shear stable viscosity         | Prevents viscosity loss due to shear.  |
| ◆ Better clutch performance      | Meets the frictional requirements for improved grip and smooth power transfer without clutch slippage or grabbing for consistent hole-shot performance.              |

### *General Description*

**Bel-Ray Thumper Gear Saver Transmission Oil 80W-85** is premium transmission oil. It provides maximum gear and bearing protection and smooth clutch performance for the most demanding off-road racing. Anti-foam and anti-oxidant properties ensure the most effective lubrication and gear protection.
